

Welcome to the Evolution of GPS Commentary

ENGAGE YOUR GUESTS

with multi-language, cinematic sound

Navilution® Next represents the only complete solution for wireless delivery of tour commentary for sightseeing companies needing multi-language tours – completely untethered. Deliver the best tour experience to your guests with engaging, entertaining tours that topple language barriers and open all-new markets.

Great Quality is Meaningless Without Reliability

Navilution Next is designed for successful tour operators requiring high-quality and reliable solutions to deliver multi-language, multi-topical stories, audio and video fast and effortlessly. With Listen Technologies, you'll increase ridership faster and more predictably, gain higher customer satisfaction ratings and remove operational barriers. Experience the world's first complete wireless commentary solution, and fill empty seats on your bus, vessel, train or tram.

Smartphone Integration

Our hardwired Driver Control Panel is optional. Connect any smartphone or tablet with a browser to our Navilution solution for an instant wireless Driver Control Panel.

Untethered Access

Thanks to the portability of the Navilution Next wireless receivers and headsets, passengers can roam freely and select their tour of choice without being assigned seating or even having a place to sit at all. Whether you're leasing buses, planning upgrades or even preparing for sale, the efficiency of moving the Navilution Next solution to another bus or boat helps you accomplish your goals quickly and easily.

Optional Live Guide

If you don't currently offer a solution for a foreign language tour group arrival, we've got you covered. Tour Directors are empowered to use a transmitter to deliver private tours alongside your automated GPS multilingual tour commentary. Seamless integration with your wireless receivers makes side-by-side delivery easy!

Introducing Cutting Edge Technology

With the latest wireless technology, Navilution Next offers tour operators the opportunity to gain new customers faster while eliminating inconsistent tours and HR headaches that come from searching for great storytellers.

Complete Control in the Driver's Hands

Designed alongside driver and captain feedback, Navilution improves safety and reduces distraction through simple, two-finger touches for drivers to access Safety, Emergency and Filler commentary (off-route audio).

Up to 16 Languages & Topics in a Single Route

Offer passengers a unique tour experience in almost any language and on multiple topics with no additional overhead through 4, 8, 12 or 16 dedicated wireless channels.

Support for PA Systems

Experience astonishing time savings when working with PA systems thanks to the simple, single-touch assignment of language channels.

An Untethered Experience

Watch your ridership multiply when passengers immerse themselves in tour experiences with the freedom to roam, thanks to wireless receivers and headsets.

Leading GPS Technology

The latest in GPS receiver technology, this high-sensitivity, highly accurate, 12 parallel-channel, WAAS-enabled GPS receiver comes with an integrated magnetic base and optional window mount.

Pain-Free System Updates

Upload tour or updates by inserting a USB memory stick, no computer needed.

Unique Video Extensibility

Enhanced attention and emotion grabbing video experiences with new opportunities for promotional and hearing-impaired communications.

Cloud Computing. Always up to Date Software

Amazing business agility, more responsiveness and support and less risk because we host Cortex in the cloud. You'll never have to worry about an update again.
